**January 29, 2018**

It fills my heart with immense pride to recommend **Mr. Kartik B Bhargav** for graduate studies in your esteemed institution. He is known for his quick-learning, unwavering focus, sheer brilliance, unconventional thinking and perseverance. He, being the alumnus of Sri Jayachamarajendra College of Engineering (SJCE), Mysuru, India, pursued and obtained his Bachelor's degree in the field of Electronics and Communications. Throughout his tenure at SJCE, through his quality work and innovative ideas, he has garnered commendable praise and recognition from both the faculty and his fellow comrades alike.

I taught him Switching Systems and Access Networks in his second year and Operating Systems in his third year. In all these courses, I remember Mr. Kartik for his quick-wittedness, discipline, punctuality and unconventional thinking. He used to proactively engage in discussions and it is his alacrity to thoroughly understand concepts has made him stand out from his peers. His skill to apply the theoretical concepts to solve practical problems is appreciable. He even was a decent performer in the academics.

I was one of the panelists for the Design and Implementation Lab in his fourth year, where he worked on the project "Optical Character Recognition for Musical Notes and playback", which he successfully completed by developing an optimal software working model. The software developed by him was both time efficient and speed efficient and thereby stands out as an exemplary work that reflects his software proficiency.

Along with acquiring the required technical skills, Mr. Kartik was very active in extracurricular activities. He was an integral part of IEEE-EDS student branch and took part actively in various technical events. He even proactively participated in Texas Instruments India Analog Design Contest and was selected in top 150 out of 12000 applicants.

Mr. Kartik's academic excellence, robust design skills, eloquent communication abilities and proficient programming methodologies has held him high above his contemporaries. He deserves all the encouragement and opportunity to pursue his academic endeavors. I recommend Mr. Kartik B Bhargav strongly for admission in your esteemed university for Master's Program and I truly ascertain that he will be an asset to the institution and by his perseverance and brilliance he will make your institution proud.

Sincerely,

**N. Shivaprasad**  
Assistant Professor
